

Late Filing

Dear FCC Commissioners & Staff:

'It has been brought to my attn that you are considering the restriction of broadband/DSL to only the big boys of the Internet world - This is a big mistake when you consider the disasterous consequences associated with the computer hackers who will have found the field narrowed to perform their corrupting viruses not to mention the thousands of sickos who prey on spreading their porn to unsuspecting recipients. All these have taken place via large ISP's like AOL - DO NOT RESTRICT THE SUPPLY OF ISP's to customers!! This is an open market competetive business so leave it this way for Godd sake!!

Phil Heard

Sincerely,

Phil Heard
